## LOAD AND LOCK

Fashion meets security with the Lock-A-Bye tote bag.

Kathleen Parisi and her sisters conceived of the theft- and knife-resistant bag while vacationing in the Caribbean. One had to stay with their stuff while the other two frolicked in the water.

The bag uses a locking zipper, enclosed galvanized cable strap and slash-resistant material. Unlatch one end of the strap to secure around a fixed object, and your stuff ain't goin' anywhere.

The trio of inventor/entrepreneurs plans to roll out a line of fashion-forward security bags for business people, college students and travelers of all stripes.
